$$A = (-17) + (+3)$$
 $B = (-7,3) + (-12)$
= -14 = -19,3

$$C = (+21) + (+11)$$
 $D = (-7) + (+7)$
= 32 = 0

Exercice 2

Exercise 3

$$A = (-17) - (-3)$$
 $B = (-7,3) - (+12)$
 $= -17 + 3$
 $= -7,3 - 12$
 $= -19,3$

$$C = (-21) - (-21)$$

$$= -21 + 21$$

$$= 0$$

Exercice 4.

10....15....1 = -4 -> En effet:
$$10-15+1=-5+1=-4$$
.
-5....108 = -3 -> En effet: -5+10-8=5-8=-3.

Exercise 5
$$A = (+12) + (-11) + (+25) + (-17)$$

$$= .12 + 25 - 11 - 17$$

$$= .37 - 28$$

$$B = (-2,4) + (-9) - (-6,4) + (-8,3)$$

$$= -2,1 - 9 + 6,4 - 8,3$$

$$= 6,4 - 2,1 - 9 - 8,3$$

$$= 6,4 - 19,4$$

$$C = (-31) + (+19) - (+8) + (-19) + (-17) + (+59)$$

$$= -31 + 18 - 8 - 18 - 17 + 59$$

$$= -31 - 8 - 17$$

$$D = 9 - 4 + 6 - 11 - (-8) + 3 - 2$$

$$= 9 - 4 + 6 - 11 + 8 + 3 - 2$$

$$= 9 + 6 + 8 + 3 - 4 - 11 - 2$$

$$= 26 - 17$$

$$\frac{AB}{AB} = \frac{2 - (-1)}{A} = \frac{2 + 1}{A} = \frac{3}{A}.$$
absciss de B

$$BC = 2 - (-2,5) = 2 + 2,5 = 4,5$$
